

Comments made by Charter School Teachers to HSML Teachers

- From a Sage Oak teacher to Barnett:
Thank you for reaching out about this. I continue to be impressed with HSML's dedication to supporting our students.
- To Edwards and Skipper:
The teachers are beyond amazing.
- To Wolff:
Love your program. It's way different than a typical online math class because of the mandatory class sessions and the expectation that the students will be involved. As the teacher of record, I have confidence that my student is actually learning something because she is being held accountable to her exams. Thanks!
- To Ellis:
Excellent teacher--prompt feedback, great communication, gifted at eliciting participation during live classes, clear and concise instruction.
- To Edwards and London:
I'm very pleased with the instructors, the course and communication.
- From a River Springs teacher to Skipper:
(This is regarding a student who was needing some specialized care) Thank you for your support. She has learned a LOT!
- From an Ocean Grove teacher to Ellis:
Thank you for a great semester. I'm so thrilled with both ___ and ___'s progress. I worked with ___ a LOT last year to get her ready for pre-algebra. She's done so well and is shyly gaining confidence in math. ___, too. Both of these young women were "bad at math" - but I'm on their case that they are not, actually. They feel very successful in your classes.
- To Jones:
(AMP Student) Thank you for all you have done to support _____ this year. It has been a consistent part of his learning. We are all grateful.

(AMP Student) First, you have been absolutely amazing with my kids this year. You are the reason that they are learning and whether or not they finished the course, we are all very grateful for your dedication to them.

I have had emails from other charter school teachers when I have tutored students, but I have deleted my older emails and didn't keep a record of these comments. I know some were from Sage Oak teachers about how the tutoring helped the student succeed in the course.

Comments made by Community Partners to HSML AMP Teachers

- (AMP Algebra 1) He's only in 8th grade but his private school doesn't offer advanced math options for 8th graders. So through some research we found this program (HSML). It's working well for him. He goes across the hall to an empty room while his class does math and just logs in. He says the system is super easy to work with and the recorded lessons are really good.

I administer quizzes and tests at home but that's about it.. I check in with him to make sure he's on track...but he's mostly on his own.

So thank you! It seems like this is really working for our situation.

- (AMP Honors Calculus II) Thank you so much for reaching out. Already, I am feeling more at ease. This is a real leap of faith for us. We are a very very small rural school. ... Later comment: The more I learn, the happier I am that we chose this option.
