

From the Fall 2023 survey, 269 responses from those who said their child feels successful in their math class, users could check more than one response:

Answer choice #1: My child has always been successful in math, this class is not very challenging for them. 27 students / 10% of respondents

Answer Choice #2: My child is working hard and knows that their diligence is helping them succeed. 236 students, 88% of respondents

Answer Choice #3: The teacher communicates math concepts in a way that helps my child understand. 213 students, 79% of respondents

Answer Choice #4: The teacher's encouragement is a big part of my student's success. 162 students, 60% of respondents

My child feels successful in their math class

Which of the following are true (check all that apply and/or fill in your own answer.)

269 responses
