

Hi Students and Parents,

I hope you're ready for math tomorrow, I'm looking forward to meeting you and starting our math journey together. Here are a few last minute things you should know:

1. Getting in to class: If this is your first time to ever be in a GoToMeeting class, please click this link to install what is needed to enter class: _____ (You can do that now or you can do it tomorrow as you enter.) If you have been in class before, or if you've already done the install process from the link above, you will go to www.joingotomeeting.com and enter the meeting ID# _____. That ID# is posted on our class page in case you forget it, but I recommend that you write it in your book or your spiral so it's always handy.

2. Remember, class is from _____ CENTRAL time. Make sure you know what time that is at your house. :) I'll be in class 15 minutes early the first day so come early and let's make sure we get over the technical issues before we even start class. :)

3. Posted on our class webpage is an HSML Family Handbook. Please take time (both parents and students) to read through that. There is a lot of helpful information in that handbook!

4. Make sure that you can login to our class page on the website. You received an email from registration@highschoolmathlive.com when you registered that had a link to set up the password. (Returning students - your password did not change.) There is only one login per family, so the login will be the email address the password link was sent to.

5. Print the syllabus, which is also attached, and have that with you for class tomorrow. It looks simple, but it's deceptively tricky and I want to make sure you understand how to use it. This document is also posted to our class page, in case you need to reprint it.

6. If you don't have your book yet, let me know and I'll send you some scans of the first few sections we cover. (If you haven't ordered your book yet, do that immediately -

I'll see you tomorrow at 1!
